

Protecting Your Business, Community, and Employees

BUSINESS CLASS SURVEILLANCE

Why Business Class? At LEVERAGE, we have years of experience successfully delivering purpose-built public safety surveillance solutions for cities and municipalities. Our solutions have helped many of America's troubled communities flourish by improving the security of our parks, shopping districts, schools and other public areas. LEVERAGE has taken those very same solutions that have helped improve security in our cities and communities, and made them highly affordable for commercial applications.

Now you can take advantage of the very same intelligent surveillance architecture used by some of America's most progressive emergency response organizations and put it to work for your business!

Unified Surveillance Architecture

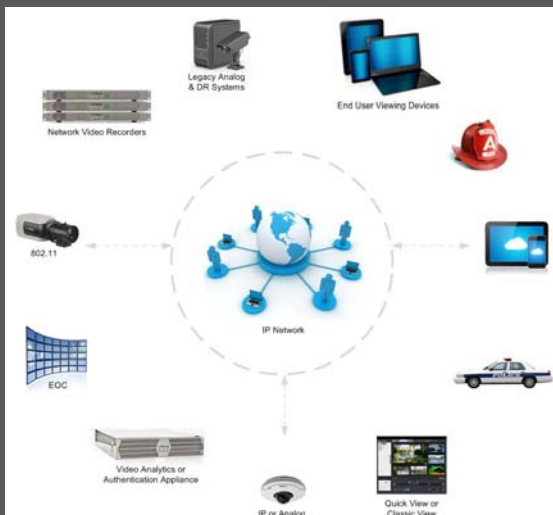

The cornerstone to LEVERAGE's Unified Surveillance Architecture is our Open Systems Video Management Suite (LEVERAGE VMS). Our Quick View Pro and Quick View Classic open architecture platforms provide the user interfaces which allow viewing and exporting both live and recorded video.

LEVERAGE's Detect Appliance provides access to third party video analytics such as license plate capture or gunshot detection. Further, the Authentication Appliance ensures strict

management of user access to video. Communities across America have benefited greatly with their ability to access high quality video from a virtually limitless number of cameras, at any time, from nearly any type of end-user device. All cameras can be recorded at the highest resolution possible with no restrictions.

LEVERAGE's unified architecture enables community-wide shared access to resources. For example, when cities install LEVERAGE's "street level" city-wide surveillance often public utilities, fire departments, waste management and many other community service providers share these resources. Not surprisingly, numerous businesses and schools choose to take advantage of our unified architecture and link their independent systems to the city in which they operate in order to improve both employee or customer safety, and responsiveness to emergency situations.

Figure 1. LEVERAGE's Unified Surveillance Architecture

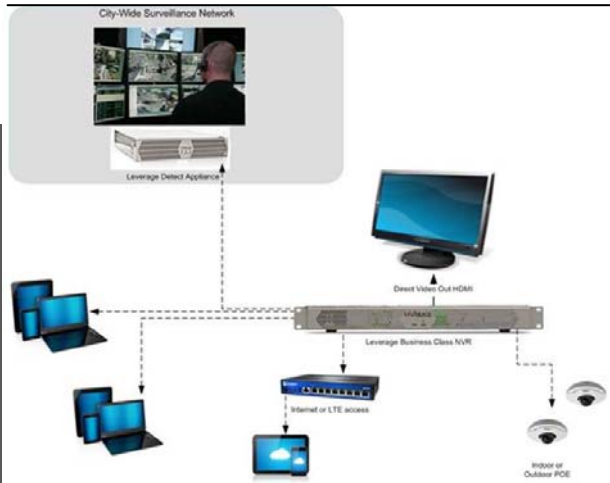

Business Class

LEVERAGE business class surveillance lets you view, record and manage video information from virtually any place, and at any time, while using nearly any type of personal viewing device you choose. Our business surveillance system provides you with a level of organizational awareness and control that is unprecedented. With LEVERAGE your video can be made accessible directly by Police or Fire department responders in the case of an emergency. Business class surveillance has moved far beyond a discussion of Analog vs. Digital recording.

Figure 2 illustrates a LEVERAGE Business Class system suited for small businesses. A full range of capabilities is available with this system including remote access of cameras, local display of video to a dedicated monitor, and system management with Leverage VMS Classic View software. Cameras are selected based upon the desired surveillance expectations of the client, with Leverage able to provide recommendations for best

Call us today and ask one of our public safety consultants to assist you in designing a customized surveillance system that meets your current and future needs.

Figure 2. Business Class Surveillance

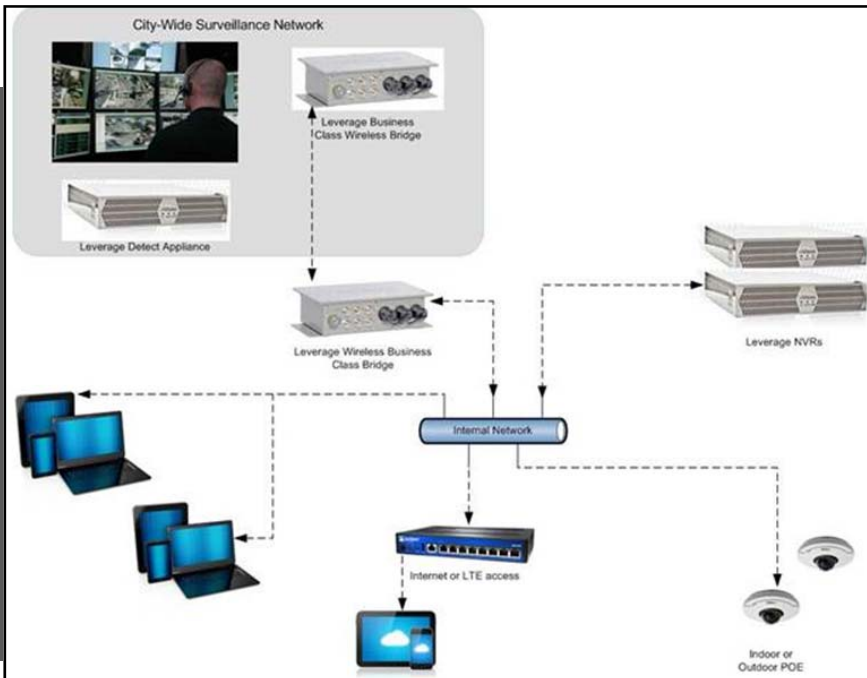

Cameras are recorded locally at the Leverage Business Class NVR. An HDMI output provides viewing of cameras on the dedicated monitor, which are selected by using Leverage VMS Classic View software. Classic View can be installed on one or more end user workstations or laptops, no

Medium Sized Business Class Surveillance

The primary difference between a medium and small sized business system is the complexity of the network, and thus the additional capability of the system.

LEVERAGE's solution is scalable from a small or "Business Class" sized deployment to a medium or even enterprise sized business. This allows a business to grow in both the number of cameras and the number of protected sites. LEVERAGE's architecture is nearly limitless in the number of cameras and locations a business can have. Figure 3 below illustrates a typical medium sized business deployment.

Figure 3. Medium Sized Business

LEVERAGE's solutions include:

Video Management Software

Security Cameras

Analog or IP-based

Lenses (in a variety of sizes and types).

Specialty cameras, such as infrared, low-light and night vision.

Network Video Recorders

Choose from single, one-channel, and portable units for covert surveillance.

Facility-wide Serverless distributed enterprise system

Monitors

Full line of monitor types, sizes, resolutions and formats.

LCD and flat panels supported

Services offered by LEVERAGE include:

Surveillance Readiness Assessment

Surveillance System Design

Installation

Maintenance and Support

Benefits of LEVERAGE's Business Class Surveillance:

Remote Viewing: Our surveillance can be viewed from nearly any kind of computer or personal device desktop, laptop, pad or cell phone.

Networked Video Solutions: IT infrastructure can carry live and archived video to authorized users across your organization.

Scalability: While built for small business, our solution can scale to both mid-size and enterprise size organizations while protecting your original investments.

Accessibility: Our surveillance can give you the ability to quickly and easily view access events in multiple areas of your facility.

Profitability: Our surveillance can provide you with greater control over loss while lowering liability and insurance costs.

Productivity: Our surveillance can help you solve workplace violence, harassment and poor customer service.

Reliability: Network video recorders (NVRs) mean no more broken or worn-out tapes, and no more costly maintenance.

Enhanced Capabilities: NVRs allow you to store more information using less space. Plus, events captured with NVRs can easily be accessed, recorded to a USB stick, DVD or duplicated when an additional copy is required.

Remote Access: NVR's can help you oversee your business from anywhere you have remote connectivity.

Part No.	Small Business Class NVR
LEV-BZ-CL-500*	SMB Class NVR, Leverage VMS, Leverage Classicview sw client for Windows,1TB, RAID 0, Fault Tolerant, 1U RM NVR, Linux, Wireless Accessible,Leverage VMS (Includes LM-BZ-CL-500 1 year of remote support), Web Based Training Included. Installation Available - call for a quote
LEV-BZ-CL-501B*	SMB Class NVR, Leverage VMS, Leverage Classicview sw client for Windows, 1TB, RAID 0, Fault Tolerant, 1U 19" RM, Linux, Wireless Accessible, Leverage VMS, 2 ea Indoor only IP Camera w/ fixed IRIS, 800x600, H.264 or MJPEG, 30fps. 2ea Outdoor fixed IP Camera w/ Varifocal lens 800x600, H.264 or MJPEG, 30fps (includes 1 yr LM-BZ-CL-501B remote support) Web Based Training Included. Installation Available - call for a quote
LEV-BZ-CL-501Bi*	SMB Class NVR, Leverage VMS, Leverage Classicview sw client for Windows, 1TB, RAID 0, Fault Tolerant, 1U 19" RM, Linux, Wireless Accessible, Leverage VMS, 4 ea Indoor only IP Camera w/ fixed IRIS, 800x600, H.264 or MJPEG, 30fps. (includes 1 yr LM-BZ-CL-501B remote support) Web Based Training Included. Installation Available - call for a quote
LEV-BZ-CL-503B*	SMB Class NVR, Leverage VMS, Leverage Classicview sw client for Windows, 1TB, RAID 0, Fault Tolerant, 1U 19" RM, Linux, Wireless Accessible, Leverage VMS, 2 ea Indoor IP Camera w/Varifocal IRIS, 1280x800, H.264 or MJPEG, 30fps. 2ea. Outdoor Fixed IP Camera w/ Varifocal IRIS 1280x800, H.264 or MJPEG, 30fps (includes 1 yr LM-BZ-CL-501B remote support) Web Based Training Included. Installation Available - call for a quote
Part No.	Enterprise SA NVR
	Enterprise Class NVR, Leverage VMS, Supports Quickview Pro & Quickview Windows client , 1 to 8TB, Fault Tolerant, 2U 19" RM, Linux OS, Supports 60 Streams per NVR within Leverage Network Architecture, Stackable.
NVR-2000-SA-01*	2TB, RAID 0, Fault Tolerant, Web Based Admin Training Provided (REMSUPP12) Included all SA NVR Products for 1st yr)
NVR-4000-SA-00*	4TB, RAID 0, Fault Tolerant,Web Based Admin Training Provided (REMSUPP12) Included all SA NVR Products for 1st yr)
NVR-4000-SA-01*	4TB, RAID 0+1, Fault Tolerant,Web Based Admin Training Provided (REMSUPP12) Included all SA NVR Products for 1st yr)
NVR-8000-SA-00*	8TB, RAID 0, Fault Tolerant,Web Based Admin Training Provided (REMSUPP12) Included all SA NVR Products for 1st yr)

* Patent Pending
