

LEVERAGE to Attend COPSWEST with New Partnership Announcement

Leverage Information Systems is attending 2014 COPSWEST Training & Exposition with a SightLogix partnership announcement. Smart thermal perimeter security technology from SightLogix combined with LEVERAGE's purpose-built public safety video management suite is a strategic collaboration, designed to provide best in class solution for outdoor area and exterior facility security needs.

Alan Gatlin, Director of Surveillance Systems, SLE, Transportation, and Utilities at Leverage Information Systems, stated, "Our partnership with SightLogix provides LEVERAGE with a unique opportunity to start a different conversation with communities around the nation. The SightLogix solution accurately triggers alarms when outdoor intrusions occur, preventing crime, vandalism and disruptions day and night, under all conditions. Combined with LEVERAGE's VMS, coverage areas are significantly increased while reducing low nuisance alarms, making this solution the most cost-effective in the industry."

COPSWEST will take place 10/6/2014 - 10/9/2014. The conference provides public safety officials of all ranks and agency sizes an opportunity to explore the newest technology, learn from industry leaders and network with current and future leaders from throughout California and beyond. All ranks from public safety agencies and government departments are encouraged to attend the four-day event featuring 3-days of educational training sessions and a 2-day Expo.

Location: Long Beach Convention Center

Booth Number: 358

About LEVERAGE:

LEVERAGE has years of experience successfully delivering purpose-built public safety surveillance solutions for use in police and fire departments, community parks, utilities, schools, and businesses. Working with industry and emergency response leaders, LEVERAGE has developed surveillance solutions which are proven to dramatically reduce crime, improve public safety, and heighten trust between law enforcement and the community, all while reducing costs.

About SightLogix:

SightLogix makes smart thermal camera systems that prevent crime, protecting some of the world's more important sites, including assets in the energy, transportation, chemical, utility, communications, and defense industries. Unlike video surveillance cameras that simply record video for review, SightLogix SightSensors automatically detect security violations in real-time to alert responders with full situational awareness.
