

LEVERAGE Attended 2013 CPCA Training Symposium to Demo IP Solutions

LEVERAGE has attended **2013 CPCA Training Symposium** on February 26th at Palm Springs Renaissance Hotel. This year's theme "Recognizing Today for a Better Tomorrow" highlighted the importance for law enforcement to remain at the cutting edge.

LEVERAGE's team went to the show with a goal to demonstrate solutions for IP Surveillance in action. LEVERAGE's unified, proactive, city wide IP Surveillance Systems are based upon an open system distributed architecture allowing for sharing of surveillance video between agencies. Most importantly, it provides a common monitoring platform that scales from the Command Center to mobile devices in the field. This allows for real-time situational awareness and response capabilities. The solution is comprehensive and delivers a complete end-to-end intelligent surveillance architecture. Its advanced technological features provide instantaneous and predicative response to undesirable random acts of nonconformance.

LEVERAGE also presented mobile surveillance solution at the conference. Cities across America found Express Mobility to be a force multiplier in the mitigation of chronic nuisance crime such as graffiti or illegal dumping. LEVERAGE's mobile systems can be quickly and easily moved to proactively capture activity, improve the acquisition of forensic evidence, and provide agencies with a low cost - high impact tool.

About LEVERAGE

Leverage Information Systems is a solutions provider and full-service systems integrator with more than 25 years of experience and the expertise to deliver some of the most important networks in the world, including those for national security, intelligence, defense, federal, state and local government, national science programs as well as finance, healthcare and enterprise customers. Key attributes that define these systems are: absolute security, high-performance, scalability and high reliability.
